EXPERIENCE

Junior Software Developer

[WeThinkCode_](#)

📅 02/2025 Present

📍 5 Ubla Avenue, Parktown, Johannesburg, 2193

- Developed object-oriented Java applications, including Toy Robot and Mars Rover simulations, implementing navigation logic, obstacle handling, and JavaFX interfaces.
- Built full-stack simulation solutions using separation of concerns, SQL databases, and RESTful servers with Javalin.
- Contributed to Coding Clinic and Brownfields projects by debugging legacy systems and improving code maintainability.
- Collaborated in agile development teams, conducting code reviews and pair programming sessions to deliver high-quality software solutions on deadline.
- Applied industry best practices including version control (Git), test-driven development, and continuous integration workflows.

Supervisor, Participant Engagement

[Setshaba Research Centre](#)

📅 09/2020 04/2023

📍 2088 Block H, Soshanguve H, Soshanguve, 0152

- Trained and supervised staff on filing protocols and access control, ensuring GCP compliance and accountability for 4,000+ study files.
- Led archiving operations to resolve storage limitations, coordinating teams, resources, and compliant long-term storage.

TECHNICAL SKILLS

Languages

Python Java

Cloud & DevOps

AWS Docker Kubernetes Powershell

Frameworks & Libraries

React Native Springboot

Tools & Databases

SQL Git

EDUCATION

Occupational Certificate: Software Engineer

[WeThinkCode_](#)

📅 Ongoing to May 2026

AWS Certified Cloud Practitioner
[Amazon Web Service](#)

📅 08/2024

Diploma: Travel & Tourism Management
[IIE Rosebank College](#)

📅 05/2015

National Senior Certificate (Matric)
[Hillview High School](#)

📅 12/2012

Notable Projects

Simulated Phone tracker

Java, Powershell, AWS Lambda, API Gateway, Cloudwatch, IAM

 24/2026

 <https://github.com/SibusisoSkhosana/Findito>

- Developed a secure serverless backend to simulate remote phone location triggering to demonstrate authentication, event-driven architecture, and cloud monitoring using AWS services.
 - Implemented API Gateway and Lambda integrations with IAM-based security controls to ensure protected access and scalable execution.
-

Student Intervention System

Streamlit, Pandas, Scikit-learn AWS S3, Athena, CloudFormation, Lambda, Glue

 07/2025

 <https://github.com/SibusisoSkhosana/StudentInterventionSystem>

- Built a predictive analytics platform for a hackathon to identify at-risk students, processing 3 years of student performance data and achieving 85% accuracy in early risk prediction.
- Developed an interactive Streamlit dashboard visualizing attendance patterns, grade trends, and early warning indicators, demonstrated to hackathon judges and peers; fully integrated with AWS data pipelines.

Achievements

Promoted to supervisor

Promoted from research assistant to supervisor at Setshaba Research Centre after showing diligence and leadership.

2nd Employee of the year

Named 2nd Employee of the Year among over 200 staff members for outstanding performance, innovation in file management systems, and commitment.

Spoken Languages

English Ndebele Tswana Zulu
